## Report Comments

### INTRODUCTION

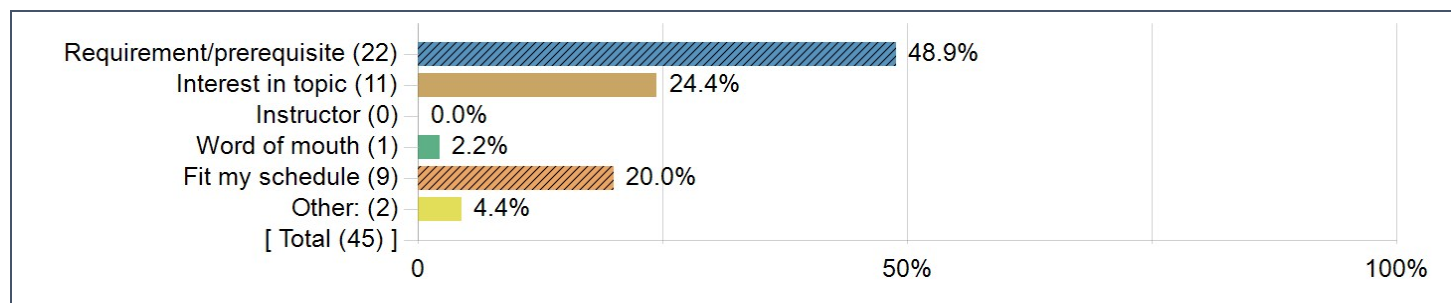

Teaching is a fundamental purpose of the University of Florida and the dissemination of new knowledge in our classrooms, studios, and clinics enables our students and trainees to fully explore their intellectual boundaries. Assessment and evaluation of our courses are designed to enhance instruction and maximize learning to meet the mission of the university. This report contains the results gathered through the new GatorEvals system. Students were invited to share their feedback on the teaching and course material. We invite every faculty member to examine the analysis in the report and utilize the resources provided in the report. Thank you for your continued great work!

Chris Hass, Ph.D.  
Associate Provost for Academic and Faculty Affairs

| I'm sure many students would appreciate it if she did not release grades until she was finished grading as this caused a lot of confusion and stress. |
| It is super helpful when you are in a class that the instructors stay relatively current with grading the homework. She did a great job with this!    |
| This instructor is an amazing educator and does not need any additional constructive feedback.                                                        |

| I thought some of the assignments were copy and pasted from previous semesters. It did cause a bit of confusion at times, so a little more attention to detail when it comes to the details of the specific week-to-week assignments would have been very helpful.                                                                                                                                                                                                             |
| Some of the assignments were not clear or consistent across the different pages within this course. This made it confusing to figure out what was required and expected through the assignments.                                                                                                                                                                                                                                                                               |
| The final essay to get the word count credit for the course should be eliminated since throughout the semester various words are written. Like 400 plus words including the 3 peer reviewed that must be done for each module assignment of the week.                                                                                                                                                                                                                          |
| Make the discussions shorter                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| The instructions for a lot of assignments could have been better. They're vague and confusing. The extra credit was nice to have but most of it is just guess work.                                                                                                                                                                                                                                                                                                            |
| I think that perhaps the essay for the writing credit could have been a grade in the course or bonus points                                                                                                                                                                                                                                                                                                                                                                    |
| Nothing, maybe make textbook option something more affordable                                                                                                                                                                                                                                                                                                                                                                                                                  |

| There were no closed captions or transcripts available for lectures and many of the videos assigned throughout the course, which made following along difficult at times. These should be provided in future semesters.                                                                                                                                                                                                                                                        |

| I personally wasn't a huge fan of the google earth stuff but I can see its utility. I would have preferred to do more discussions as opposed to mapping activities.                                                                                                                                                                                                                                                                                                            |

| I think some of the instructions could be clarified or written in a way that is more clear, but other than that the course is well organized.                                                                                                                                                                                                                                                                                                                                  |
| I do not think the textbook should be required for the course. I think the powerpoint lectures are informative enough to understand the material. I think all of the discussion questions were really interesting and required critical thinking. I especially liked the documentary discussion questions (e.g., the division in Hispaniola). I think the Word Cloud assignment would have been easier as an individual assignment.                                            |
| The course felt like more busy work than actually enjoying what we were learning.                                                                                                                                                                                                                                                                                                                                                                                              |
| N/A, maybe more explanation for group projects as this was the hardest assignment to navigate in my opinion                                                                                                                                                                                                                                                                                                                                                                    |
| Overall, the course was structured very well. There were a variety of assignments to complete and they all helped me learn the material better. The only thing I can think of to improve the class is to allow 2 attempts on the weekly quizzes. I believe that allowing a second attempt will help students learn the material better, as they will be able to review the material on any of the questions that they missed which will promote deeper understanding/learning. |
| Some modules contained way too much material in addition to the lectures. I found a lot of the extra module material to be very outdated. Also, the course states that the book is required but it is not needed for success in the course so I would change that to "recommended".                                                                                                                                                                                            |

| I am an International Studies major specializing in Latin America. I found this class to be fascinating and I learned a lot. I think that my favorite topic I learned was when we discussed the Incas and the contributing factors and advantages that the Spanish had which ultimately led them to their victory. This was a line of thinking that I had not considered before and it really opened up my eyes to look at various occupations throughout history, and to look at them through the lens of what the other factors could have been.                                                                                      |
| Because of my major this class, which focused on Latin America, was very helpful for me. I learned a lot that I will take forward in my pursuit of not only this degree but into the future as well.                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| I like how the course was set up in a way in which we had to think critically about others' work; I think it valuable to understand what can be improved but also be able to point out what is good and does not need fixing                                                                                                                                                                                                                                                                                                                                                                                                            |

| The diversity of countries we explored in the course gave me a greater understanding of different cultures in Latin America. I also learned the history of countries which has proven very helpful.                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Knowing geography feels good, as the locations of countries and borders are established in my head.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| I think the most important skill I learned, or got to improve on, in this course was my ability to look at things from a geographical perspective. I feel more aware of, or I think I can better identify, how geography influences, people, culture, and various other facets of human life on Earth. The way I see it is, not only have I now gained the ability to look at things from a geographical perspective, but I also worked on the ability to look at things from multiple perspectives. The ability to hold multiple perspectives allows me to paint a "fuller" picture and hopefully make better decisions in the future. |

| I learned about many different aspects (geography, economy, culture, etc.) of the Latin American region, which I found to be very valuable since I'm interested in pursuing a career related to international business and I'm half Costa Rican. Learning about Latin America has broadened my horizons and has helped me further develop my global perspective. Open-mindedness and deeper knowledge/understanding of other regions and cultures are the skills that this course has helped me improve, which I believe will be very useful and relevant in the future and for my professional growth.                                 |
| I learned a lot about Latin America that I didn't know before, and I feel that it helped me to become a more well-rounded student as a stem major.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
