

Report Comments

INTRODUCTION

Teaching is a fundamental purpose of the University of Florida and the dissemination of new knowledge in our classrooms, studios, and clinics enables our students and trainees to fully explore their intellectual boundaries. Assessment and evaluation of our courses are designed to enhance instruction and maximize learning to meet the mission of the university. This report contains the results gathered through the new GatorEvals system. Students were invited to share their feedback on the teaching and course material. We invite every faculty member to examine the analysis in the report and utilize the resources provided in the report. Thank you for your continued great work!

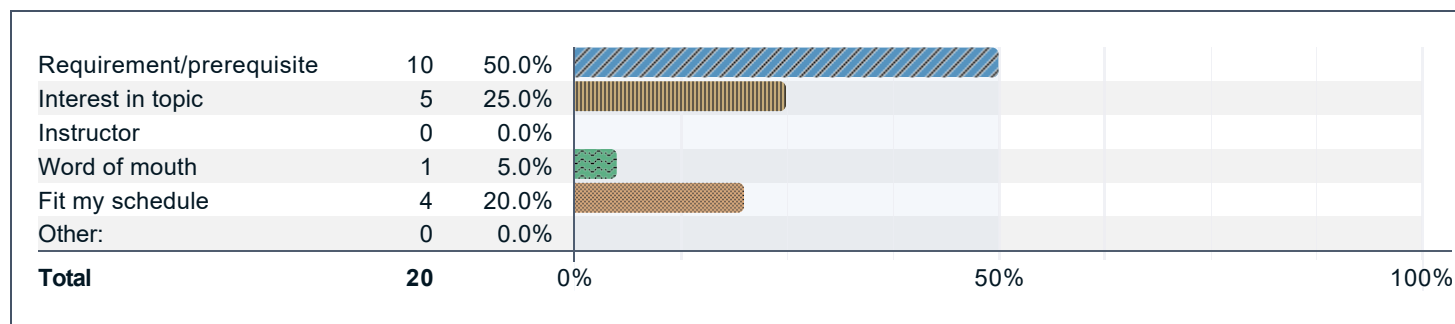

Chris Hass, Ph.D.
Associate Provost for Academic and Faculty Affairs

Resources to help you with this report:

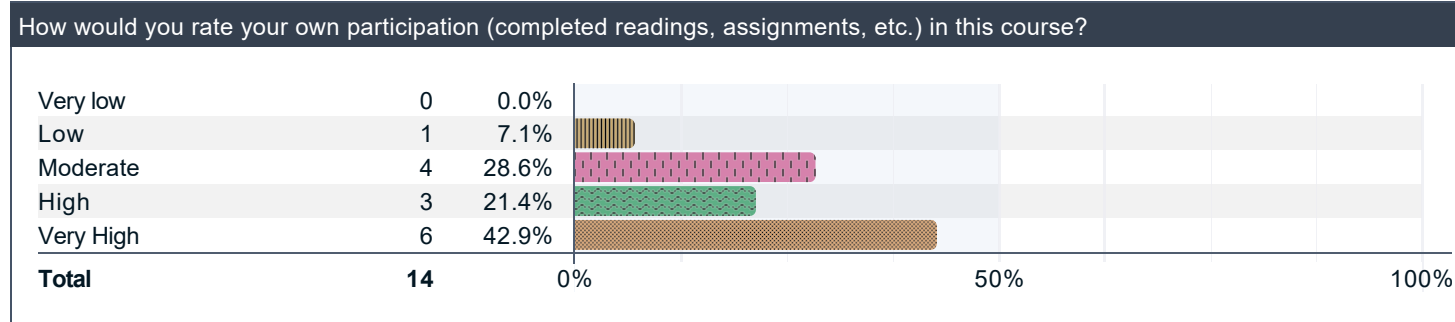

1. Consult our [GatorEvals Guide](#) for interpreting and using teaching survey results.
2. [Register for Elevate](#), a new Center for Teaching Excellence (CTE) initiative to help you create a customized trajectory for professional development, focusing on growth in areas you have identified through self-reflection.
3. GatorEvals offers the ability to [opt-in to a midterm](#) evaluation. This formative feedback offers you a chance to address student insights and adjust the course before the term concludes. Reports are only available to you and are not considered part of the T&P process.
4. Register and attend a [CTE workshop](#).
5. Schedule a [consultation](#) with a CTE staff member or your internal unit to help you interpret your results and develop a course of action.
6. Visit the [CTE Resource Library](#) for additional support.

Student Self-Evaluation Questions

Why did you take this course?

How would you rate your own participation (completed readings, assignments, etc.) in this course?

How would you rate your own participation (completed readings, assignments, etc.) in this course?

Response Count	Response Rate	Mean	IM	DPT Mean	DPT IM	College Mean	College IM
14	25.9%	4.00	4.17	4.09	4.17	4.18	4.27

University Core Instructor Evaluation Questions

	Response Rate	Mean	IM	DPT Mean	DPT IM	College Mean	College IM
The instructor was enthusiastic about the course.	20.4%	4.55	4.71	4.32	4.52	4.49	4.72
The instructor explained material clearly and in a way that enhanced my understanding.	20.4%	4.55	4.81	4.27	4.50	4.32	4.61
The instructor maintained clear standards for response and availability (e.g. turnaround time for email, office hours, etc.)	20.4%	4.64	4.81	4.36	4.59	4.47	4.71
The instructor fostered a positive learning environment that engaged students.	20.4%	4.55	4.71	4.31	4.52	4.41	4.68
The instructor provided prompt and meaningful feedback on my work and performance in the course.	20.4%	4.36	4.58	4.24	4.51	4.27	4.60
The instructor was instrumental to my learning in the course.	20.4%	4.18	4.58	4.11	4.38	4.19	4.57
Overall	20.4%	4.47	-	4.27	-	4.36	-

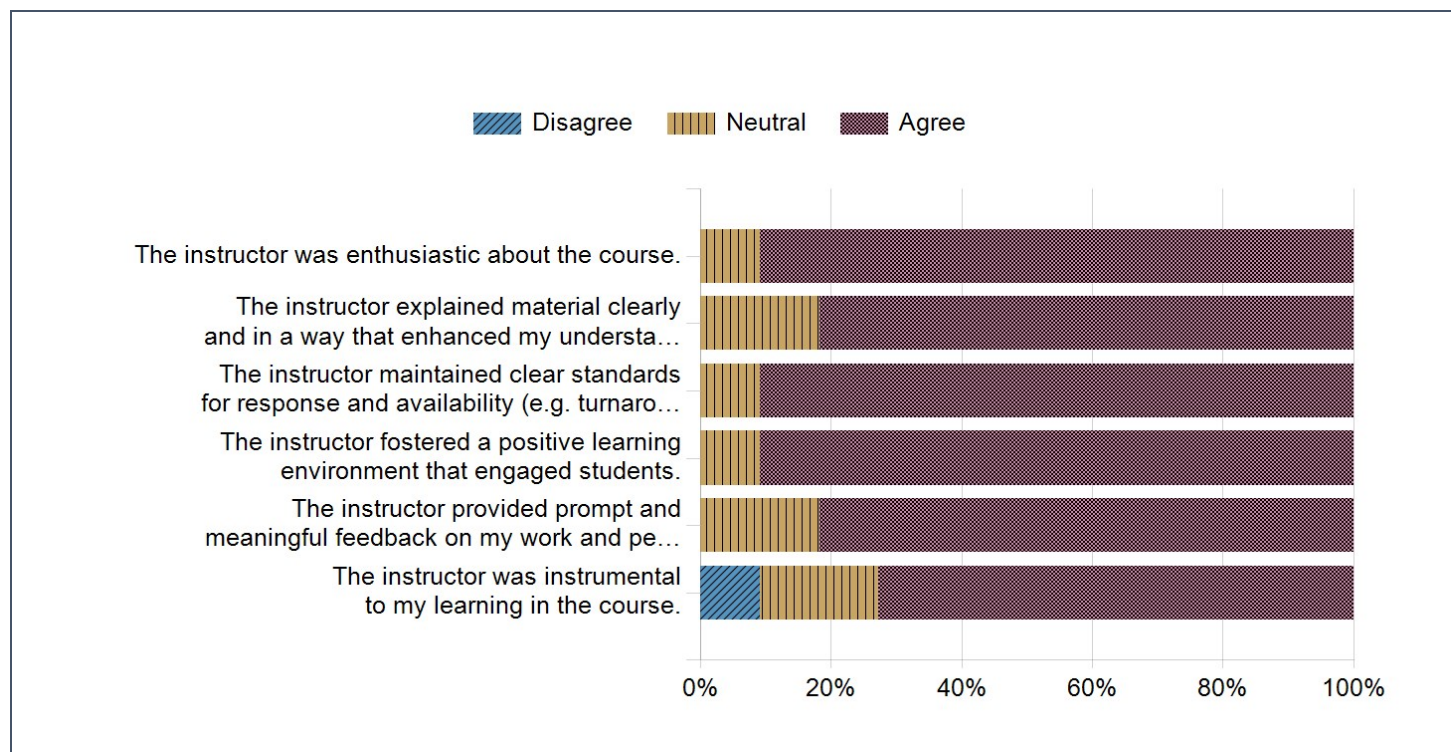

University Core Course Evaluation Questions

	Response Rate	Mean	IM	DPT Mean	DPT IM	College Mean	College IM
Course content (e.g., readings, activities, assignments) was relevant & useful.	25.9%	4.21	4.30	4.26	4.31	4.26	4.36
The course fostered regular interaction between student and instructor.	25.9%	3.79	4.25	3.70	3.86	3.96	4.15
Course activities and assignments improved my ability to analyze, solve problems, and/or think critically.	25.9%	4.29	4.50	4.21	4.27	4.21	4.33
Overall, this course was a valuable educational experience.	25.9%	4.29	4.33	4.25	4.32	4.24	4.39
Overall	25.9%	4.14	-	4.11	-	4.17	-

Free Response Section

Please identify the instructor's strengths that contributed to your learning in the course.

Comment
yes
Did not interact enough to know.
Because of Ms. Harris–Coble's patience, I was able to ask questions and thoroughly understand the content in a supportive learning environment. Her excellent organizational abilities also made sure the course was well–organized and simple to follow, which significantly improved my comprehension and memory of the material.
She was great at communicating.
attentive
Same opinion: This instructor is clearly knowledgeable about this topic, and it shines through. The actual creation of this online–only module is great. For an online class, it covers its goals effectively and forces the student to engage with the content, and this good material is a reflection of a good professor.
She was very approachable, provided timely grading, and offered helpful feedback on assignments.
N/A

What additional constructive feedback can you offer the instructor that might help improve the course?

Comment
no
none.
Because of her great organizational abilities and extraordinary patience, Ms. Harris–Coble fosters a relaxed and orderly learning atmosphere that keeps kids attentive and involved. More multimedia activities could be added to the course to promote student engagement.
Leaving comments on my labs with help to improve my answers would be great!
nothing to say here
Same opinion: There needs to be more interaction with the professor, somehow. I would have really appreciated some kind of online lecture to help me feel engaged with the class, as it seemed rather impersonal.
Something as simple as a 1–hour recorded lecture covering the topics of the assignments would be invaluable in grounding the learning experience and also making me feel more like I truly want to learn the topics in the class.
I believe the course would benefit from more interaction between the instructor and student.
N/A

What constructive suggestion(s) do you have for improving the course materials, organization, and assignments?

Comment
no
Could be less repetitive and intense. I hope the assignments could more varied.
To improve comprehension of intricate geological processes, I propose adding more interactive digital materials to the GEO2200L/Dynamic Planet Earth Lab course, like 3D models or virtual field visits. All things considered, these modifications might improve the course materials' readability and engagement.
I think maybe adding a lab quiz at the end of each module would be good for retention.
nothing to say here
There needs to be more lecture based learning and way less, "do it yourself."
I know that works for many people, its novel, its effective, but it just doesn't work without something else to ground the experience. Classes that rely on self study exclusively feel disingenuous, and I think that makes students less likely to apply themselves.
I will say, my criticisms come from the place of an in–person student, maybe its not so bad for an online class, but I have no real frame of reference. The lack of lecture content was a bit jarring, and the assignments were a little bit grueling without having developed any real passion for the topic. These could be my own issues, but its something to potentially think about. I'd advise my criticism to be taken with a heavy grain of salt, as this topic isn't even really tangentially related to my fields of study. Effectively, my criticisms should be considered less valuable than someone who is taking this class for the purposes of passion of in–field study. I took it for a credit, and that's on me.
While this course is a lab and is intended to provide hands–on experience with certain topics, I believe it would benefit from more interaction and guidance from the instructors. Increased engagement and support would enhance the learning experience and help students better understand the material.
I did not like the set of this course and felt that there were not enough learning materials provided. I did not feel that I learned thoroughly the objectives of this course.
None, it was set up to where everything was asynchronous.
None

Please identify the topics and/or skills you learned in the course that you believe will have the highest application for future courses or professional growth.

Comment
yes
I think my reading comprehension may have improved.
In the GEO2200L/Dynamic Planet Earth Lab, I learned how to read geological maps, analyze earth processes, and comprehend plate tectonics. Gaining expertise in spatial reasoning and data analysis from this course will help me advance in both academic research and real-world fieldwork.
I think taking this as my first lab course was beneficial because I needed to take a lab to better understand myself academically.
I worked on my discipline to turn in assignments
Being able to engage with time series data was useful for my statistics growth, as it gave me some realistic grounding for a conceptual topic. The actual assignments here were very interactive, which is good for learning applied skills, they just suffered from a lack of direction.
Overall, I gained a better understanding of Earth's systems and how they function. I believe topics like climatology, Earth's structures and processes, and environmental interactions will be especially valuable in the future. One of the most important skills I developed in this class is the ability to better understand and analyze these phenomena.
N/A
Being able to understand why the Earth does what it does was interesting to me and I got 1 credit hour and I got my physical science credit fulfilled at the same time!
Learning weather patterns and how to read maps

Supplemental Questions (Online)

1. The online environment of this course contributed to my ability to learn the material.			
Strongly Disagree	0	0.0%	
Disagree	2	14.3%	
Neutral	1	7.1%	
Agree	5	35.7%	
Strongly Agree	6	42.9%	
Total	14		0% 50% 100%
Statistics		Value	
Mean		4.07	
Standard Deviation		1.07	

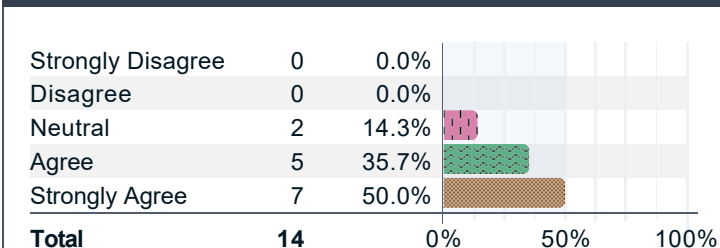

2. Student learning objectives were connected to course activities and assignments.			
Strongly Disagree	0	0.0%	
Disagree	0	0.0%	
Neutral	4	28.6%	
Agree	2	14.3%	
Strongly Agree	8	57.1%	
Total	14		0% 50% 100%
Statistics		Value	
Mean		4.29	
Standard Deviation		0.91	

3. Course content is presented and structured in a logical, consistent, and organized manner.			
Strongly Disagree	0	0.0%	
Disagree	0	0.0%	
Neutral	2	14.3%	
Agree	5	35.7%	
Strongly Agree	7	50.0%

Supplemental Questions (Lab)

1. Expectations about specific lab procedures are clearly stated in advance.

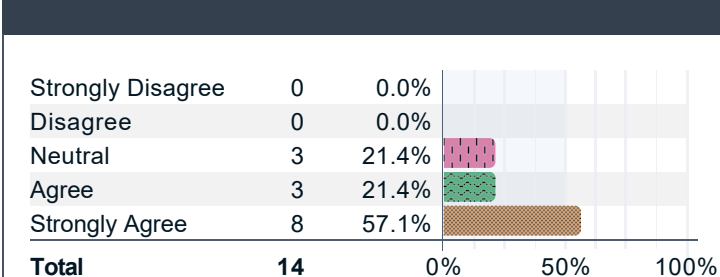

Statistics	Value
Mean	4.36
Standard Deviation	0.74
Standard Error (based on SD)	0.20

2. Lab content (e.g., readings, activities, assignments) was relevant & useful.

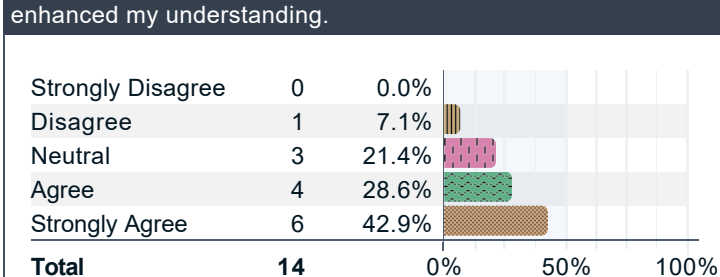

Statistics	Value
Mean	4.36
Standard Deviation	0.84
Standard Error (based on SD)	0.23

3. Lab safety procedures were adequately enforced.

Statistics	Value
Mean	4.36
Standard Deviation	0.84
Standard Error (based on SD)	0.23

4. The instructor explained material clearly and in a way that enhanced my understanding.

Statistics	Value
Mean	4.07
Standard Deviation	1.00
Standard Error (based on SD)	0.27
